Re: Student Support Services Assessment

Background

This report summarizes findings from the Spring 2025 Student Services Assessment conducted at West Valley College (WVC). The primary goals of the student and staff[1] surveys were to learn about students' and staff's awareness (Research Question #1), how students' awareness of student support services correlated with student outcomes (e.g., sense of belonging and persistence) (RQ #2), and the preferred availability and modality of student services (RQ #3).[2]

Main Findings

Research Question #1

1. There was concern that students were unaware of the many Student Support Services WVC offers. However, 80% or more of survey respondents indicated they were aware of 11 out of 15 services, and awareness ranged from 40 to 95%. Staff awareness ranged from 79% to 100%, indicating that staff were also largely aware of Student Support Services.

2. Nearly seven out of ten respondents (69%; n = 1,139) rated their ability to use and access Student Support Services as easy, and only 6% (n = 94) characterized their experience as difficult. Most students can access and receive Student Support Services with ease.

3. Among the 94 students who reported difficulty accessing Student Support Services, the main barriers were being unaware of how to access services (41%), followed by the service being unavailable (33%), and being unsure if they were qualified to receive the service (26%). Only 15% of students reported not knowing a service existed as a main barrier. These findings suggest students know services exist but lack clarity on how to access them or whether they are eligible.

4. Nearly seven out of ten students (69%; n = 1,133) learned about a service from WVC's website, which was 19 percentage points (pp) higher than the second most common source. More students reported learning about services from staff (50%) and faculty (35%) than friends (32%). WVC should continue investing in digital outreach while keeping faculty and staff up to date with knowledge about student services.

---

[1] Staff includes faculty and classified staff.
[2] For this report, we focus on services provided by the Student Services building, the Library, and Success Center (tutoring).

Research Question #2

5. Respondents who were aware of counseling were 12 pp more likely to feel a sense of belonging at WVC. Similar positive relationships existed between a sense of belonging and awareness of other services (e.g., Transfer and Career Center). This positive relationship between awareness of counseling and students' sense of belonging, illustrates the importance of informing students about which services are available.

Research Question #3

6. More students and staff said "No" than "Yes" when asked whether the hours of the Student Services building should be extended past 5 p.m. on Mondays through Thursdays and after 1 p.m. on Fridays.

7. Students and staff were divided on whether WVC should offer in-person tutoring on Fridays and whether the library should remain open beyond 4 p.m. on Wednesdays and Thursdays. More students said "No" than "Yes" to both options, while more staff responded "Yes" than "No" to both options.

8. When asked whether tutoring should be offered past 6 p.m. on Mondays through Thursdays, there were more "No" than "Yes" responses for both students and staff.

9. For both students and staff, the preferred modality to receive or provide services was a combination of online and in-person. This preference was particularly strong among staff, with 80% or more of respondents favoring a hybrid delivery of services. The second preferred modality for students and staff was in-person-only, followed by online-only.

Who Participated?

Students

The student survey was sent to all Spring 2025 enrolled students through Canvas and *Viking Weekly*. The survey was open from February 3, 2025, to February 21, 2025, and a reminder was sent on February 18. The first 250 survey respondents were entered into a raffle for a $250 gift card, and all respondents were entered into a drawing to win one of forty $25 gift cards.

There was a response rate of 17% (1657 unduplicated valid responses). Full-time students were significantly overrepresented in the survey (66%) compared to the WVC population (17%), and students over 50 were underrepresented by 12 percentage points (pp).[3] However, the survey was representative of WVC's student population across ethnicity, gender, first-generation status, and socio-economic status.

Staff

The staff survey was sent to part-time and full-time staff via email and *Viking Weekly*. The survey was open from February 3 to February 21, 2025, and a reminder was sent to staff on February 12. Thirty-two staff members completed the survey: 13 were faculty, 13 were classified and 5 were administrators.[4] More than half (55%) worked in Student Services, and 40% worked in Academic Affairs.[5]

[3] See Appendix, Table 1 on page 19-20 for complete respondent profile table.
[4] One staff survey respondent did not specify the department where they worked.
[5] See Appendix, Table 2 on page 20 for complete staff count.

Methodology

To generate ideas for the focus and content of the staff and student surveys, the Office of Institutional Research (OIR) met twice with managers of Student Support Services and conducted three student interviews.[6] All three student interviews were student-workers in the Student Services Building and were not randomly chosen from the student population. The notes from the meetings and interviews generated the following research questions:

Research Question #1
How do students' and staff's awareness, perceived importance and accessibility of student services and resources compare?

Research Question #2
How does student awareness correlate with student outcomes, such as persistence rates, sense of belonging, self-efficacy, and confidence?

Research Question #3
How do students and staff preferred schedule and modality to receive services differ?

Survey Design
The initial draft of the survey was piloted by two students. Their feedback reduced the quantity of questions and made the word choice more student friendly. Qualtrics was used to conduct both surveys and summarize some of the results for Research Question #3. Both the student and staff survey consisted of multiple-choice questions; no short-answer questions were included. All questions used random ordering to minimize response bias.

The student survey included 25 questions in total: seven for RQ #1, three for RQ #2, and 15 for RQ #3. However, skip logic was used, so depending on respondents' answers, the number of questions asked ranged from 14 to 25.[7]

The staff survey contained 15 questions: two for RQ #1, zero for RQ #2, and 13 for RQ #3. Similarly, the use of skip logic meant that respondents answered between nine to 15 questions.

WVC's student identification number (G0#) was collected to merge demographic data such as gender, race, course load, and age. All survey data cleaning, analysis, and visualizations were conducted in RStudio, a statistical software.

One limitation of this assessment is the lack of qualitative data. Interviewing more students and using short-answer questions would have improved our understanding of the research questions by providing additional context and concrete examples. These methods were not used because they are more time-intensive, but may be helpful methods for future research. Another limitation was the overrepresentation of full-time students by nearly 50 pp. This limits our student survey's insights into how the true population of part-time students truly feels in response to our Research Questions. However, this underrepresentation of part-time students is a common problem for surveys at community college across the country, not just this SS Assessment.

[6] See Appendix, Tables 3 and 4 on page 21 for list of interview questions for students and student services.
[7] See Appendix, Tables 5 and 6 on page 22 for list of student and staff survey questions.

Survey Results for Research Question #1[8]

RQ #1: How do students' and staff's awareness, perceived importance and accessibility of student services and resources compare?

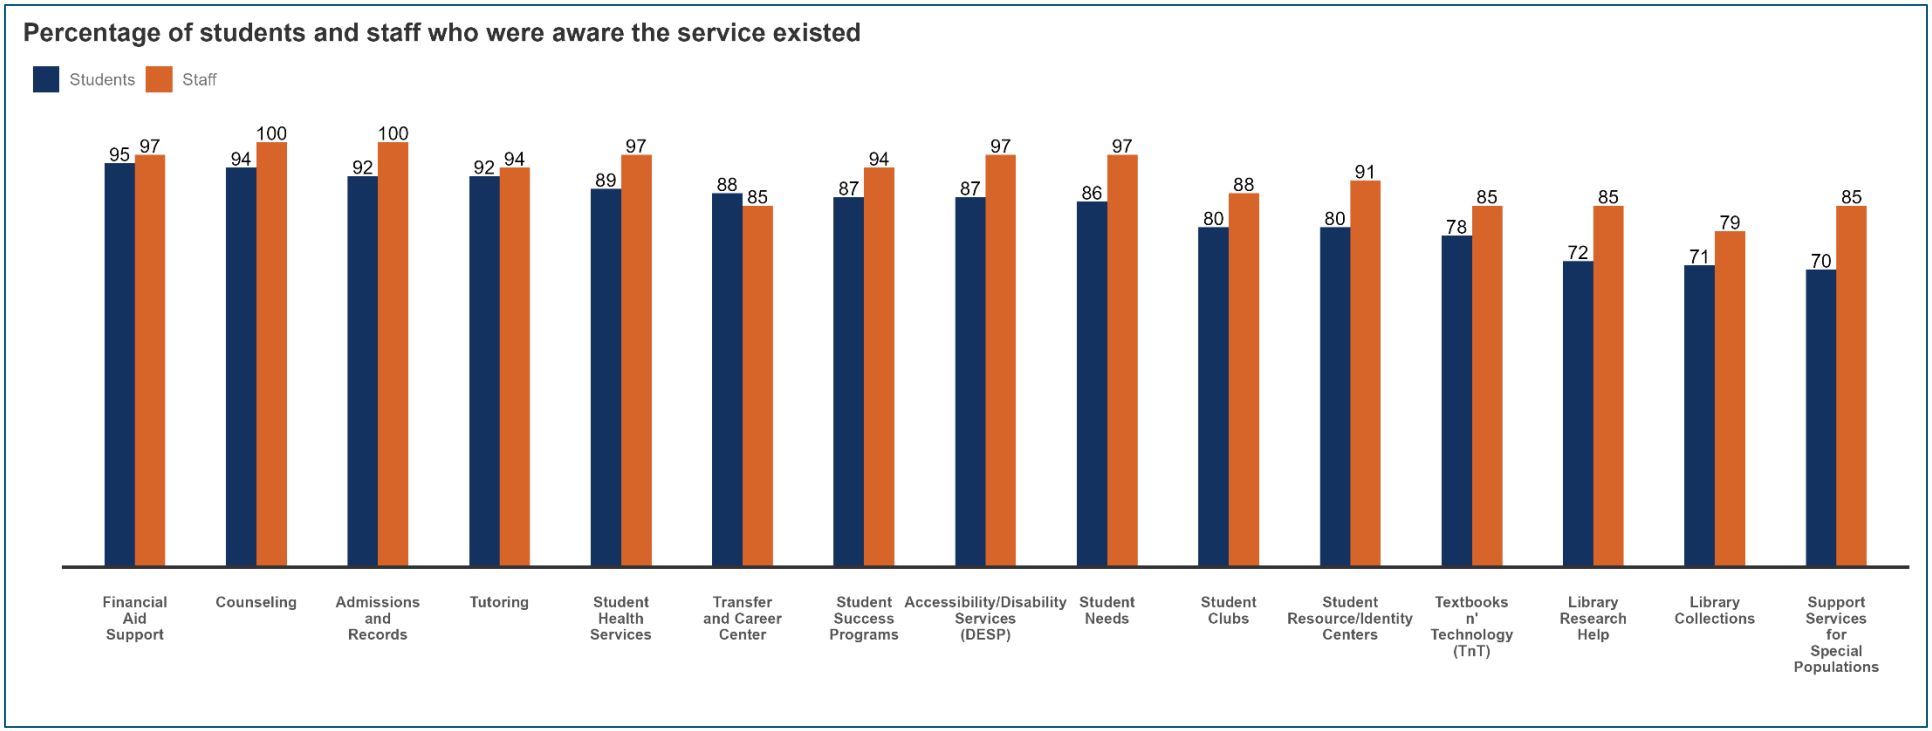
Question 1: Which of the following Student Support Services are available at WVC? Please select all that apply.

A common theme from student interviews and meetings with Student Support Services staff was a concern that students were unaware of WVC's Student Support Services, limiting how often students accessed services. However, respondents' awareness of services was relatively high, ranging from 70 to 95% of students being aware of Student Support Services (Figure 1). There was no substantial change[9] across course load (part-time/full-time), gender, or ethnicity. Staff awareness was even higher, with nearly nine out of 10 staff (89%) being aware of all 15 services.

If there is concern among staff about students not utilizing services frequently enough, it is likely not due to students being unaware of Student Support Services. However, one area to improve is increasing awareness about library services, such as library collections (71% of students were aware), library research help (72%), and Textbooks n' Technology (78%). Staff awareness was higher than students' for these three services, but it was still at the lower end of staff awareness. The exception was tutoring where 91% of respondents and 94% of staff reported being aware.

[8] See Appendix, Table 7 on page 20 for definitions of Student Support Services names and definitions.
[9] Greater than 5 pp.

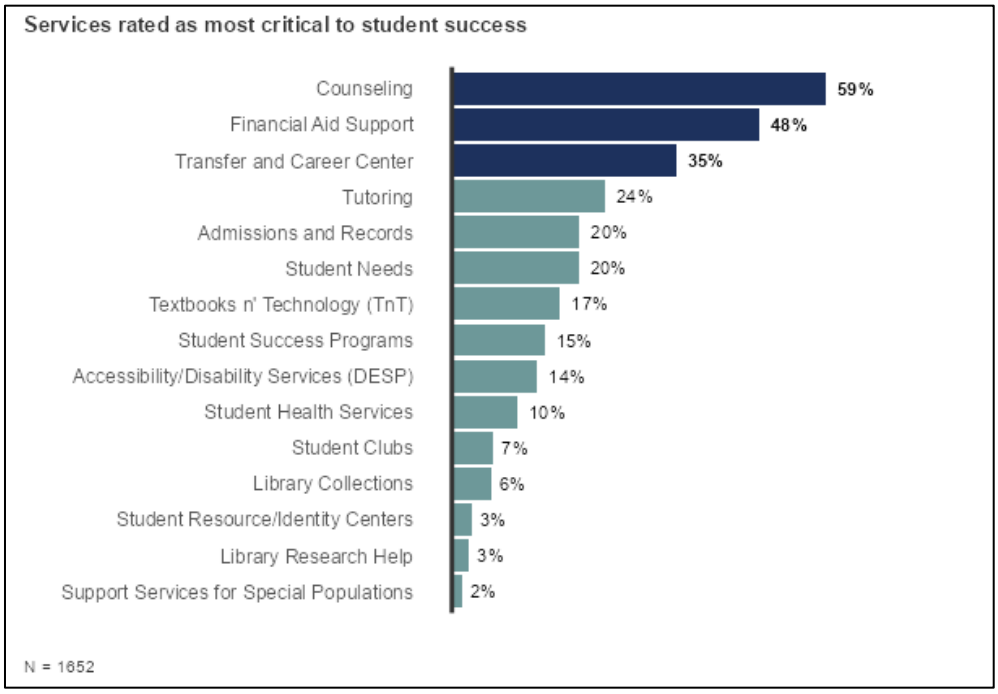
Figure 1: Most students and staff are aware of Student Support Services (student n = 1652; staff n = 32)



Question 2: Select up to three services that are the most important for your success at WVC (e.g., academic success, re-enrolling next term, completing your program on time, etc.).[10]

The top services respondents identified as important to their success were counseling (65% of respondents), financial aid support (48%), and transfer and career center (35%) (Figure 2).

Figure 2: Counseling, financial support, and transfer and career center were ranked as the most important services for students' success



Question 3: Where did you learn about the services that you selected? Select all that apply.

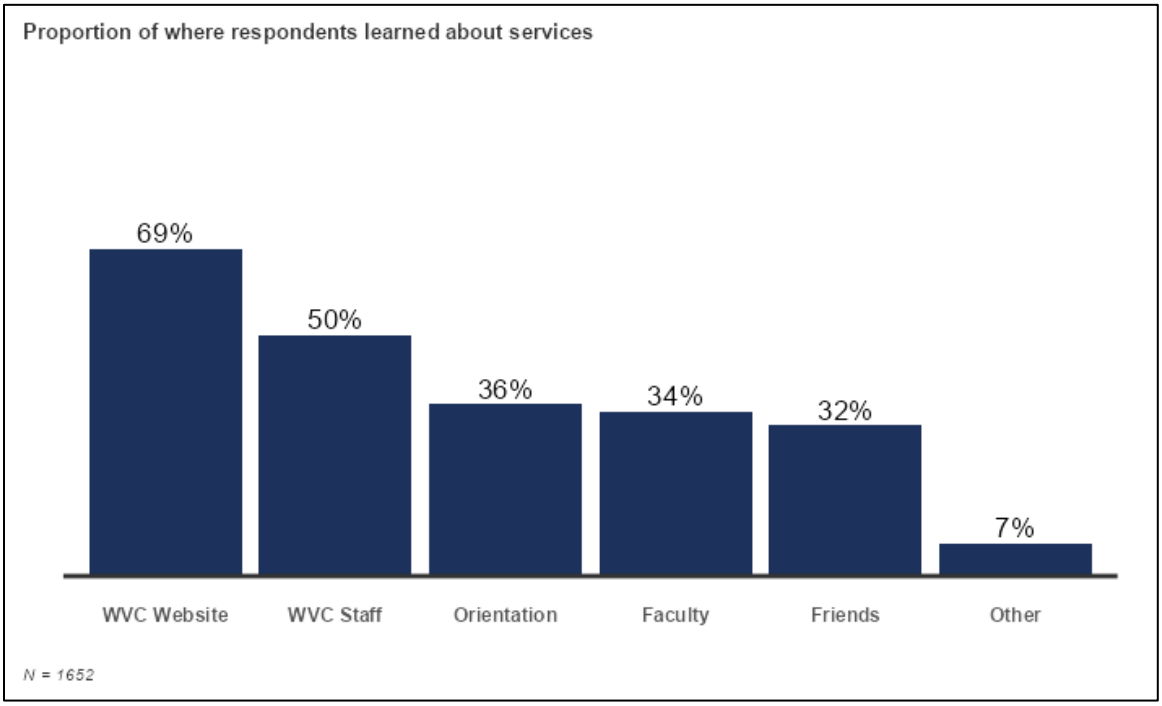
The WVC website was the most popular resource for students to learn about Student Support Services, informing nearly 7 out of 10 respondents (69%) (figure 3). It may be fruitful to evaluate and improve students' website experience, given that so many rely on the service.

Half of respondents learned about Student Support Services from staff, so spending energy to keep staff informed of services or any changes in services will likely increase students' awareness. For instance, awareness of Library Collection for both staff (79%) and students' (71%) was lower than other services. These results suggest that informing staff on how Library Collections can be accessed and utilized is one way to increase students' awareness of Library Collections.

Roughly a third of respondents (36%) learned about services from orientation, faculty (34%), or friends (32%). While student interviews suggested that friends were a primary source for students to learn about services, respondents reported friends being the least influential resource. However, overall all five sources seem effective avenues of informing students.

[10] Only students (not staff) were asked the remaining questions for RQ #1 and RQ #2.

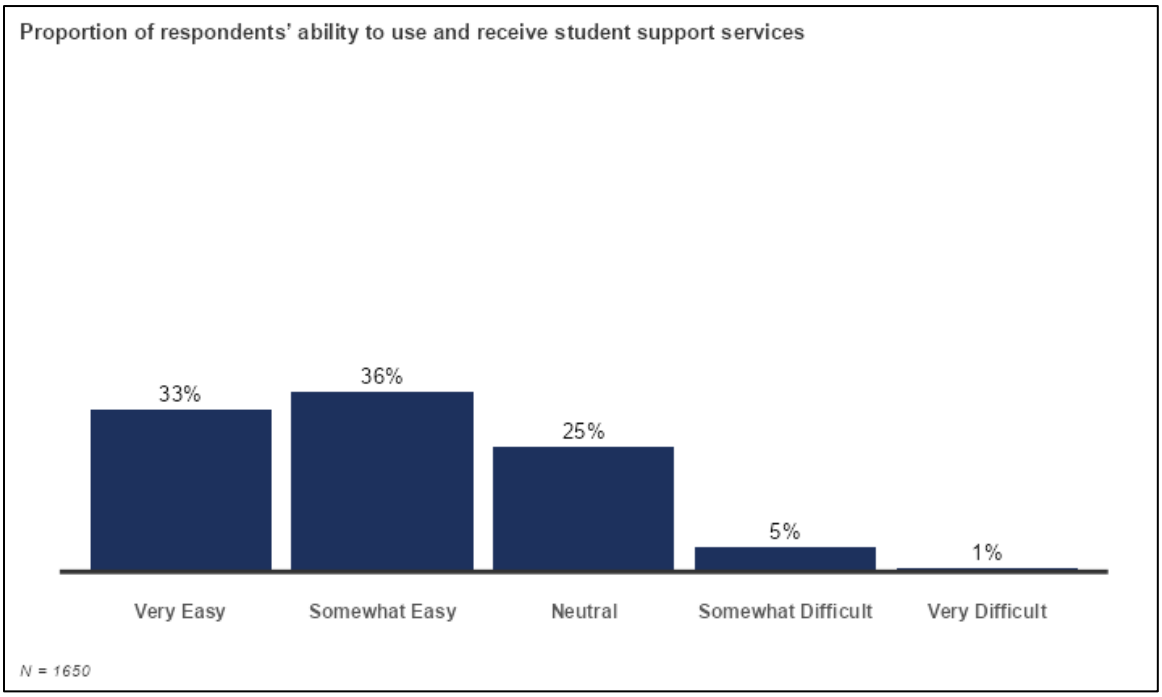
Figure 3: WVC website was the most popular resource for students to learn about services



Question 4: Overall, how would you rate your ability to use and receive Student Support Services?

Nearly seven out of ten respondents (69%) described their ability to use and receive Student Support Services as easy, and only 6% characterized their expereince as difficult.

Figure 4: Majority of respondents describe their ability to use and receive Student Support Services as easy



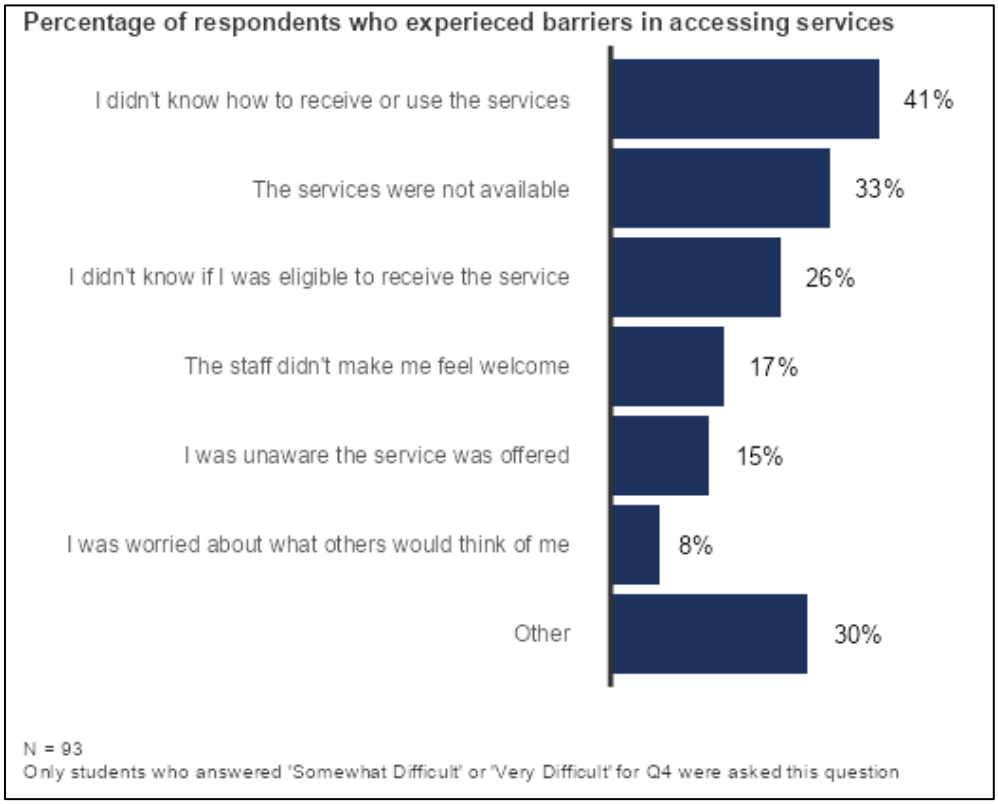
Question 6: What were the main barriers you experienced? Please select all that apply.[11]

Survey respondents reported that the biggest barrier to accessing Student Support Services was their knowledge about how to receive or use services (41% of respondents) (figure 5). Prior to the survey we suspected that students' usage of services was limited due to a lack of awareness of services, however only 15% of students reported unawareness of a service as a main barrier. This low number supports the findings from Q1 that students are highly aware of WVC's Student Support Services.

The reason why a third of students reported the services were not available is likely due to low staffing, especially in counseling and financial aid.[12] Twenty-six percent of respondents mentioned being unaware of eligibility to receive services as a main obstacle. Similar to the lack of knowledge about how to receive or use services, there is an information gap in students' understanding of eligibility requirements. We recommend reviewing WVC's website content on eligibility and how to access services and keeping staff, especially those who interact frequently with students, updated on any changes.

The most common responses for 'Other' were problems in using the website to register for services (e.g., starfish), not being emailed back, and issues related to services being unstaffed (especially counseling).

Figure 5: Most respondents were unaware about how to receive the services, but aware the service existed



[11] The results for Question 4.2 were used to group Figure 6 by services, so the overall results are not shown here. To view Question 4.2, please see Appendix, Table 5 on page 22.

[12] This was already a known problem across Student Services and is not expanded on in this report.

Figure 6: Respondents commnoly reported more than one type of obstacles most services

Type of barrier(s) students experience in using or accessing Student Support Services

	I didn't know how to receive or use the services	I didn't know if I was eligible to receive the service	I was unaware the service was offered	The services were not available	The staff didn't make me feel welcome	I was worried about what others would think of me	Other
Accessibility /Disability Services (DESP)	6	4	1	7	3	0	2
Admissions and Records	3	0	1	6	5	0	5
Counseling	8	4	3	13	6	0	8
Financial Aid Support	10	7	3	7	3	1	3
Library Collections	1	0	1	0	1	1	0
Library Research Help	5	2	3	0	0	0	1
Not specified	8	6	3	5	3	1	11
Student Clubs	2	0	2	1	0	0	0
Student Health Services	1	0	1	0	0	1	0
Student Needs	5	4	3	6	3	3	3
Student Resource /Identity Centers	1	1	1	1	1	0	1
Student Success Programs	2	3	1	3	0	0	0
Support Services for Special Populations	2	1	1	1	0	0	2
Transfer and Career Center	2	2	0	1	1	1	1
Tutoring	0	0	0	2	2	1	2

Only students who answered Q4 with 'Somewhat Difficult' or 'Very Difficult' were asked this question (N = 93).
Most students selected a barrier for more than one service (e.g., A student may have chosen 'I was unaware the service was offered' for both counseling and tutoring).

Survey Results for Research Question #2

RQ #2: How does student awareness correlate with student outcomes, such as persistence rates, sense of belonging, self-efficacy, and confidence?

Research question two was designed to capture the importance of students' awareness of Student Support Services as it relates to key measures of academic and social success. We chose to highlight one service, counseling, because the results did not change much across different services.[13]

The strongest relationship was between counseling and sense of belonging, where students who were aware of counseling were 12 pp more likely to agree that they belong at WVC (Figure 7). This signifies a positive relationship between awareness of counseling and a sense of belonging, highlighting the importance of students' awareness of counseling and potentially other services.

There was a slight increase (6 pp) in those who "Strongly Agree" about graduating on time if respondents were aware of counseling (Figure 8). However, the increase was negated if you include "Agree" as a bigger proportion of those that agreed were represented in unaware (51%) than aware (44%).

Figure 7: Respondents who were aware of counseling were more likely to feel they belong at WVC

Respondents' sense of belong at WVC, grouped by awareness of counseling

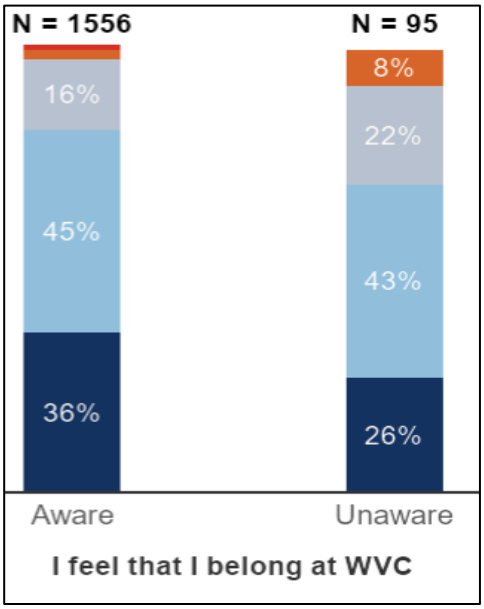


Figure 8: Respondents who were aware of counseling were more likely to 'Strongly Agree' that they were on track to graduate

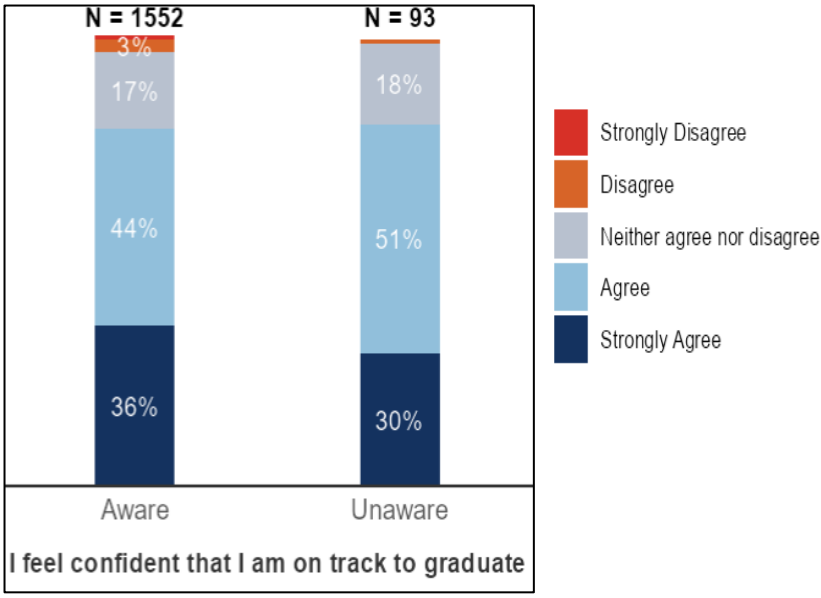
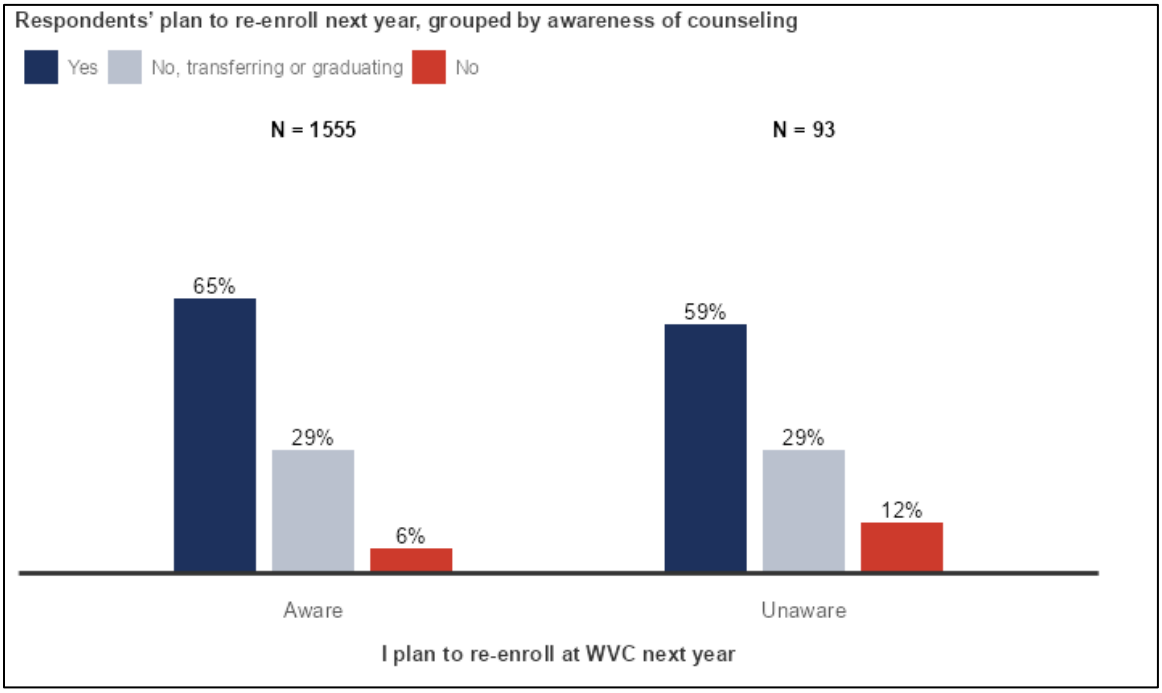
Respondents' confidence in graduating on time, grouped by awareness of counseling



[13] This is due both the high number of respondents and the fact that most students were aware of services.

Figure 9 shows a small increase (6%) in persistence rates[14] among those aware of counseling.

Figure 9: Slight increase in persistance rates among students who were aware of counseling



[14] Persistence is defined as students who plan to re-enroll for the following year.

Survey Results for Research Question #3: Part 1

This section first presents results from the student survey and then displays results from the staff survey. This section does not include commentary or interpretation from the Office of Institutional Research (OIR). Survey Results: Part 2 will include interpretation of key results from the OIR but will show very similar data to Part 1.

Results from Student Survey

Figure 10: Percentage of students' responses when asked about changing the hours and accessibility of Student Support Services (n = 1657)

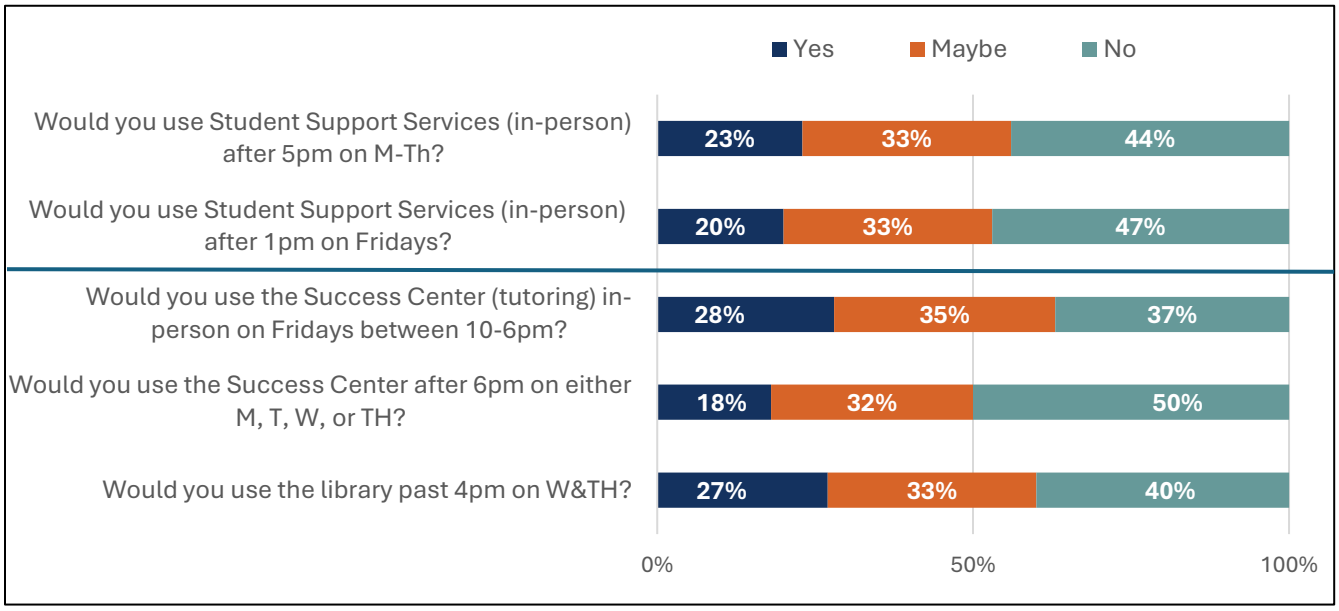


Figure 11: Frequency of students' predicted use of Student Support Services[15]

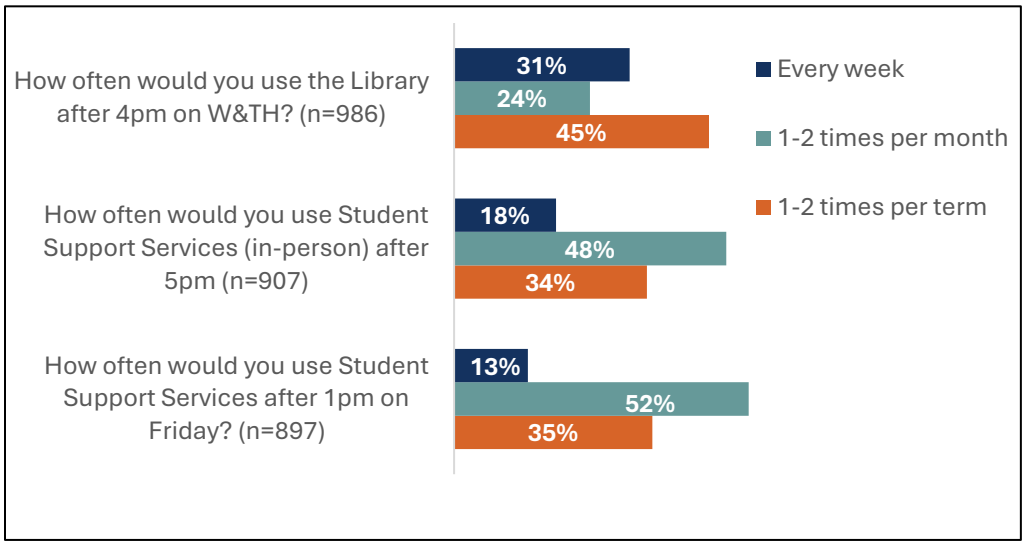

[15]*Only students who answered "Yes" or "Maybe" on the previous questions were asked this question, so the n's are lower than total number of students who completed the survey (total n = 1657).*

Figure 12: Students' preferred schedules of Student Support Services[16]

Survey Question	Days that students anticipate using the service	Students' preferred time for service to remain open
Using the Library after 4 p.m. on W & Th	NA	5:00 p.m. (12%; 115) 6:00 p.m. (28%; 277) 7:00 p.m. (25%; 243) **8:00 p.m. (36%; 356)**
Using the Success Center (tutoring) after 6 p.m. M-Th	Monday (25%; 158) Tuesday (28%; 224) Wednesday (30%; 237) Thursday (26%; 211) **All the above (41%; 327)**	**7:00 p.m. (58%; 467)** 8:00 p.m. (42%; 345)
Using Student Support Services in-person after 5 p.m. M-TH	Monday (25%; 227) Tuesday (26%; 232) Wednesday (30%; 263) Thursday (26%; 229) **All the above (42%; 378)**	6:00 p.m. (34%; 311) **7:00 p.m. (40%; 361)** 8:00 p.m. (26%; 238)
Using Student Support Services after 1 p.m. on Fridays	NA	2:00 p.m. (10%; 88) 3:00 p.m. (25%; 218) 4:00 p.m. (26%; 223) **5:00 p.m. (38%; 330)**

[16] Only students who answered "Yes" or "Maybe" (Figure 10), were asked the questions in this table.

Results from Staff Survey

Figure 14: Staff's opinions on whether the hours should change for Student Support Services

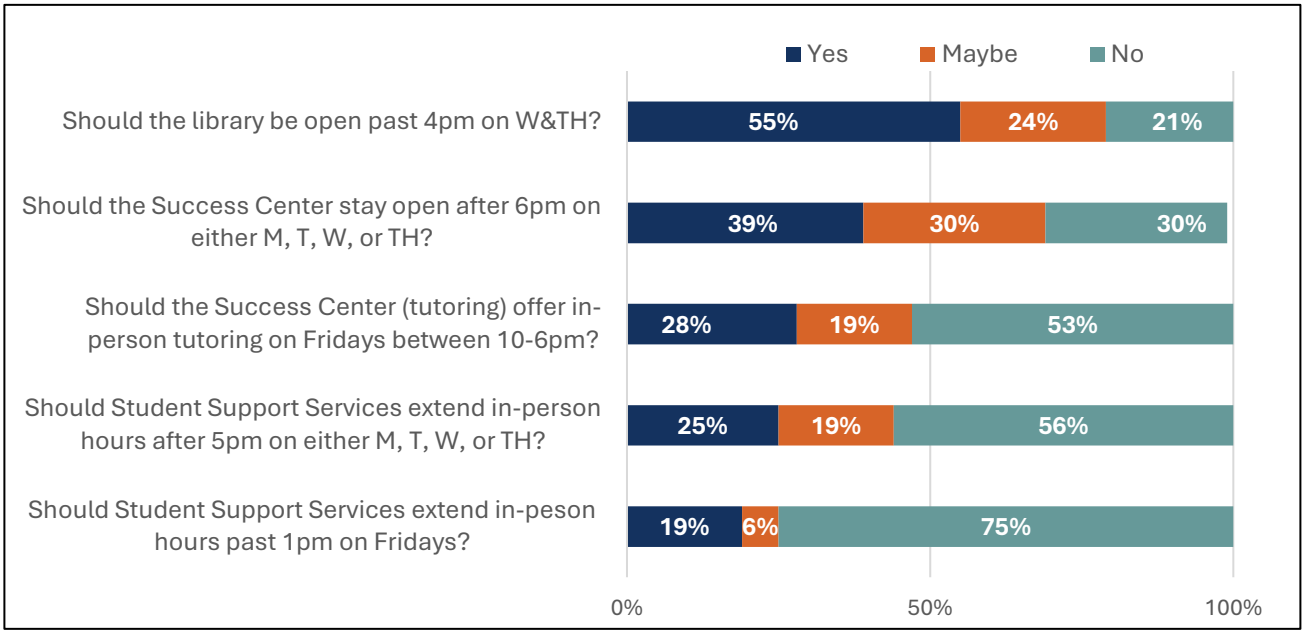

Figure 15: Staff's preferred schedules for Student Support Services[17]

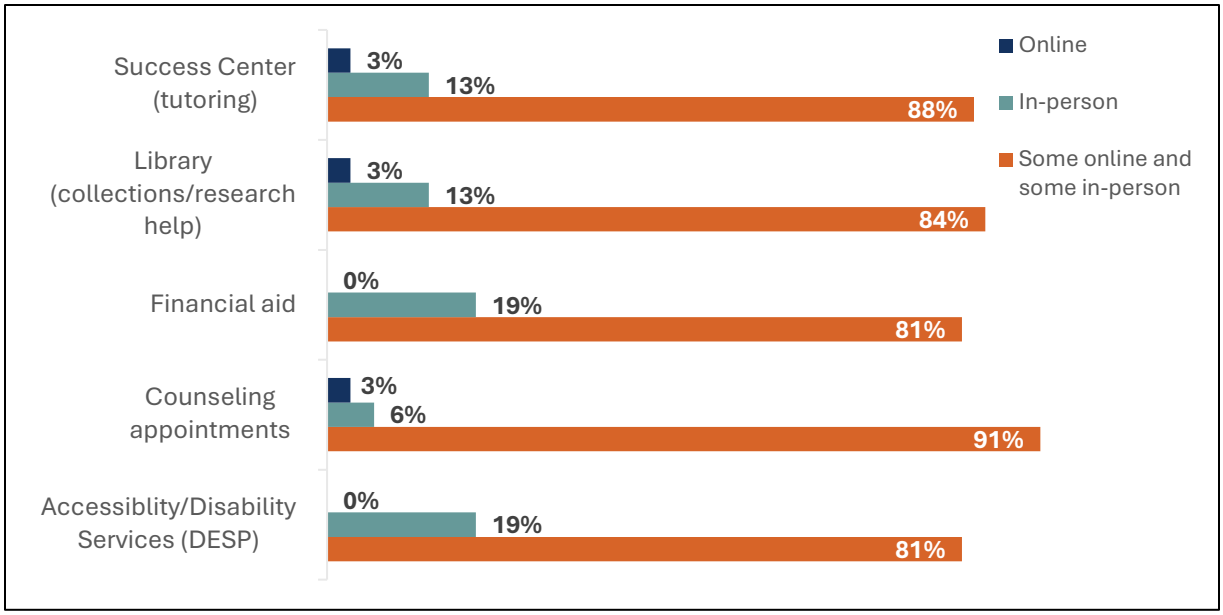
Survey Question	Days that students anticipate using the service[18]	Students' preferred time for service to stay open
Using the Library after 4 p.m. on W & Th	NA	5:00 p.m. (21%; 5) 6:00 p.m. (17%; 4) 7:00 p.m. (33%; 8) 8:00 p.m. (29%; 7)
Using the Success Center (tutoring) after 6 p.m. M-Th	Monday (27%; 6) Tuesday (27%; 6) Wednesday (27%; 6) Thursday (9%; 2) All the above (64%; 14)	7:00 p.m. (65%; 13) 8:00 p.m. (35%; 7)
Using Student Support Services in-person after 5 p.m. M-TH	Monday (14%; 2) Tuesday (36%; 5) Wednesday (36%; 5) Thursday (14%; 2) All the above (57%; 8)	6:00 p.m. (36%; 5) 7:00 p.m. (43%; 6) 8:00 p.m. (21%; 3)
Using Student Support Services after 1 p.m. on Fridays	NA	2:00 p.m. (14%; 1) 3:00 p.m. (43%; 3) 4:00 p.m. (14%; 1) 5:00 p.m. (29%; 2)

[17] Only staff who answered "Yes" or "Maybe" (Figure 14), were asked the questions in this table.
[18] Results are not bolded for this section because the n is too low for the results to be significant.

Figure 16: Staff's preferred modalities to provide services



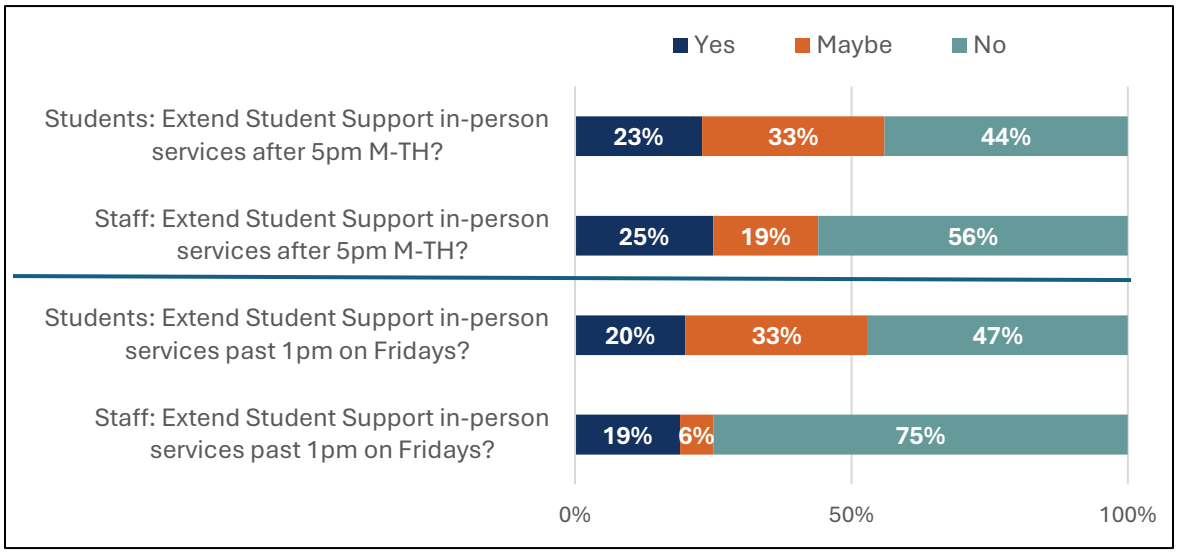
Survey Results for Research Question #3: Part 2

This section contains commentary and interpretation from the OIR and more directly compares students' and staff's responses; however, the same survey data from Part 1 is used.

Student Support Services

A fourth or fewer of both students (23%; 381 respondents) and staff (25%; 414 respondents) expressed they would use or prefer Student Support Services to be open past 5 p.m., Monday through Thursday (Figure 17, top). When asked whether Student Support Services should remain open past 1 p.m. on Fridays, a fifth or fewer of both students (20%; 331 respondents) and staff (19%; 314 respondents) responded "Yes" (Figure 17, bottom). This option was less popular than extending hours past 5 p.m., Monday-Thursday, by 3 pp for students and 6 pp for staff. For both options, more students and staff respondents said "No" than "Yes".

Figure 17: Percentage of student and staff responses when asked whether the hours of Student Support Services should change



Among the 56% of students (927 respondents) who responded with "Yes" or "Maybe" to wanting Student Support Services open after 5 p.m. Monday-Thursday (Figure 17), the majority (82%; 760 respondents) indicated they would use the services after 5 p.m. eight times or less in a semester (Figure 18).[19]

Of the students that responded "Yes" or "Maybe" (n = 927) in Figure 8, 167 respondents predicted they would use the services Monday through Thursday after 5 p.m., "Every week" (Figure 18). However, this is likely an overestimate since the total number of student visitors to the Student Services Building on Wednesdays after 5 p.m. throughout the 2024-2025 academic year was 308 students[20], just 141 respondents greater than the number of respondents who said they would use the services "Every week". We would expect the number of students who attended Student Support Services in 2024-2025 to be higher than 308 total visits, if 18% of the student population visited Student Support Services every week.

If we only include "Yes" responses (n = 366) from Figure 8, 32% of students said they would the service "Every week" (117 respondents). This suggests a difference between students' desire, as reported in the survey, and students' behavior in the academic year. We can therefore view 18% as the maximum proportion of students who would use the services after 5 p.m., with the understanding that the true percentage would be considerably lower.

Of the 55% of students (n = 911) that responded with "Yes" or "Maybe" to having Student Support Service open after 1 p.m. on Fridays, 13% said (118 respondents) they would visit Student Services after 1 p.m. on Fridays (Figure 19). When only "Yes" responses were included (n = 331), 25% reported (83 respondents) using Student Support Services "Every week". Again, we can comprehend these numbers as upper bounds of the number of students that would use the service, given the overall usage of the Student Services building in the 2024-2025 academic year.

Figure 18: Students' expected frequency of using Student Support Services after 5 PM, Monday - Thursday

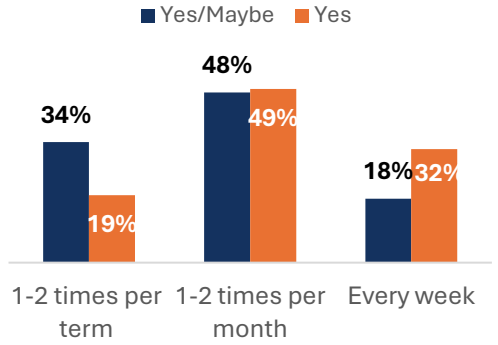


Figure 19: Students' expected frequency of using Student Support Services after 1 PM on Fridays

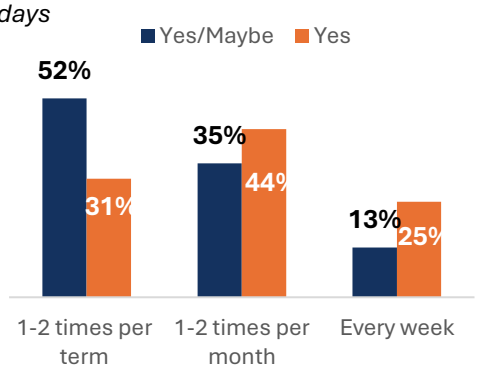

Respondents were asked to select their preferred modality to receive or provide Accessibility/Disability services (DESP), counseling appointments, and financial aid in the form of "Online", "In-person", or "Some online and some in person. Respondents selected one preference for each of the three services.

[19] This number was calculated by adding the percentages of students who anticipate using the service "1-2 times per term" and "1-2 times per month".

[20] This number includes visits from the following departments: counseling, admissions and records, Disability and Educational Support Program (DESP), and financial aid. See Appendix, Table 8 on page 23 for full breakdown.

Both students' (Figure 20) and staff's (Figure 21) preferred modality to receive or provide services was "Some online and some in-person" for all three services. Students' survey results were more varied than staff, with a greater proportion of students preferring "In-person" (26%-35%) and "Online" (19%-27%) than staff (Figure 20). More than four out of five staff preferred to provide all services with "Some online and in-person" (Figure 21). The hybrid preference was particularly prominent for counseling, with over 90 percent of staff preferring a combination of in-person and online.

Figure 20: Percentage of students' preferred modalities to receive services

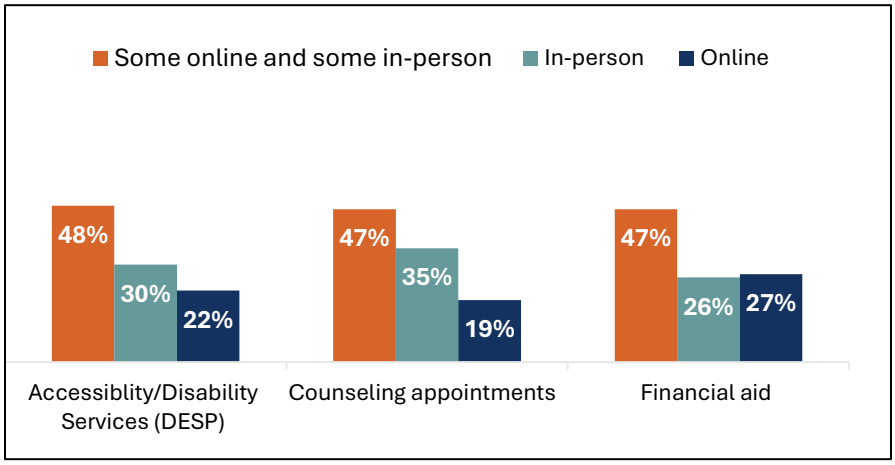

Figure 21: Percentage of staff's preferred modalities to provide services

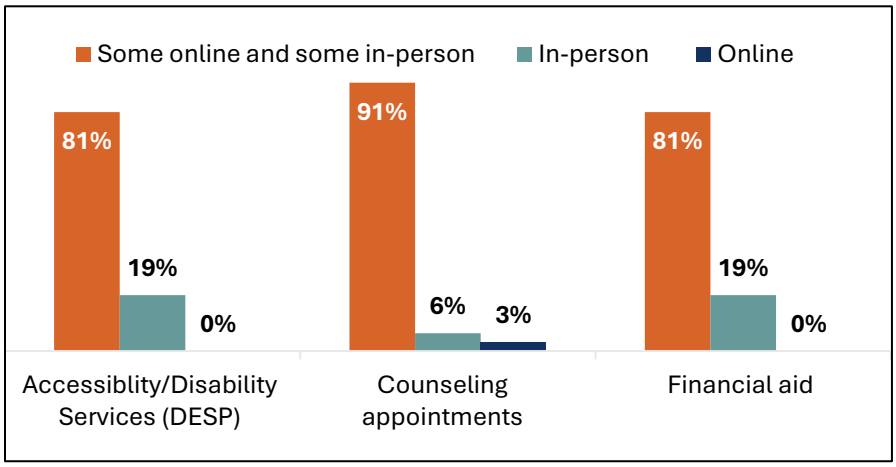


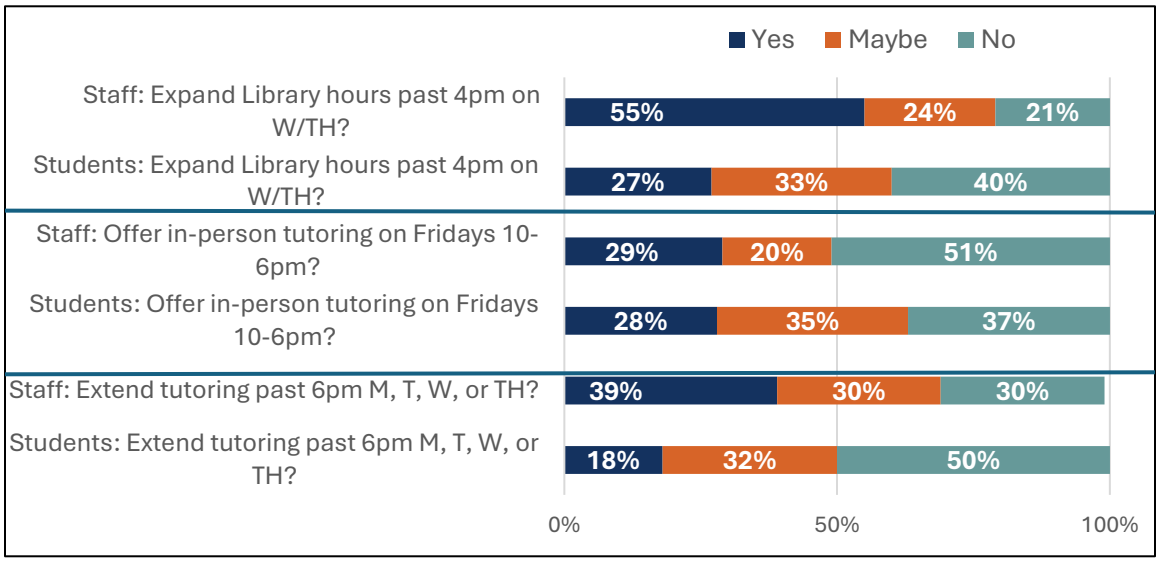
Library and Success Center

Compared to Student Support Services, there was more disagreement among students and staff about the desired accessibility of the Library and Success Center (Figure 22). More student respondents responded "No" than "Yes" to increasing access to tutoring and the library. However, more staff said "Yes" than "No" to two out of the three proposals.

Staff strongly supported expanding the hours of the library past 4 p.m. on Wednesdays and Thursdays (55% responded with "Yes"), which garnered less than a third of student support (27%) (Figure 22, top). Another difference greater than 20 pp between staff and students was whether tutoring should be expanded past 6 p.m. on Monday-Thursday, with more staff (39%) than students (18%) supporting the idea (Figure 22, bottom).

Staff and students showed similar levels of support for in-person tutoring on Fridays, with only a 1 pp difference in "Yes" responses (Figure 22, middle). However, staff were more decisive, with fewer "Maybe" responses (15 pp) and a higher proportion of "No" (14 pp) responses compared to students.

Figure 22: Percentage of staff and students' opinion on whether the Library & Success Center should extend their hours



Similar to the desired modality for Student Support Services, both students and staff preferred hybrid for the Library and Success Center. The preference was particularly strong for staff, with more than 80% of respondents preferring "Some online and some in-person". Slightly fewer than half of student responses preferred hybrid modalities, and almost one in four students preferred in-person. For both groups, services offered only "Online" was least desirable.

Figure 23: Percentage of students' preferred modalities to receive services

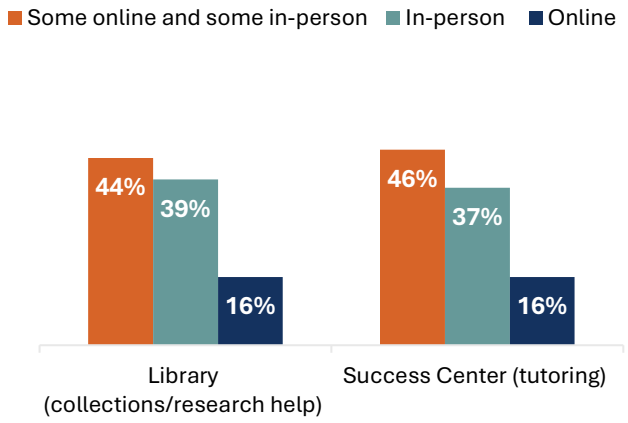


Figure 24: Percentage of staff's preferred modalities to provideservices

Table 2: Demographics for Staff Survey Respondents

- Staff Responses: 32[21]
  - *Position (31 responses)*
    - Faculty: 13 (42%)
    - Classified: 13 (42%)
    - Administrators: 5 (16%)
  - *Office/Area (29 responses)*
    - Student Services: 16 (55%)
    - Academic Affairs: 11 (40%)
      - AA: School of Science and Math: 5
      - AA: School of Language Arts: 3
      - AA: Cilker School of Art & Design: 3
    - President's Office / Institutional Research / Marketing / Administrative Services / Provost's Office/ Other: 2 (7%)
  - *Employment Status*
    - Full-time: 31 (100%)

[21] One respondent only answered the first two questions of the survey and did not list their position; however, they were included in the overall count.

Table 3: Student Interview Questions

- How has your experience with student services been over the past year, including areas like financial aid, counseling, health services, basic needs support, career services, and enrollment services?
- Can you describe your experience with the library, including its tutoring services, physical space, and online resources?
- Which specific support or resources within student services have been most helpful to you?
- Have you encountered any challenges accessing or using student services over the past year?
- What changes or improvements would you like to see in student services?

Table 4: Student Services Focus Group Questions

- What aspects of the student experience do you think need the most support (e.g., academic support, mental health, campus resources)? Why?
- What new information do you think would be most helpful for improving student services, either for staff or students?
- How do you envision using the new information to make changes or improvements in student services? (e.g., if we knew X, this is how we could achieve Y).
- Are there specific groups within the student body whose feedback you want to highlight or prioritize?
- What demographic information would be most useful to capture (e.g., gender, age, race, enrollment statues, etc.)?

Table 5: Student Survey Questions[22]

RQ#1
Q1.1 & 1.2: Which of the following Student Support Services were available at WVC? Please select all that apply.[23]
Q2: Select up to three services that are the most important for your success at WVC (e.g., academic success, re-enrolling next term, completing your program on time, etc.).
Q3. Where did you learn about the service that you selected?
Q4.1: Overall, how would you rate your ability to use and receive Student Support Services?
Q4.2: Did you encounter any barriers in using or receiving the services listed below?
Q5: What were the main barriers you experienced? Please select all that apply.

RQ#3
Q6.1: Would you use the library after 4 p.m. on Wednesdays and Thursdays?
Q6.2: Until what time would you prefer the library to remain open on Wednesdays and Thursdays?
Q6.3: How often would you use the library after 4 p.m. on Wednesdays and Thursdays?
Q7.1: Would you use the Success Center after 6 p.m. on either Monday, Tuesday, Wednesday, or Thursday?
Q7.2: Which days would you anticipate using the Success Center after 6 p.m.? Please select all that apply.
Q7.3: Until what time would you prefer the Success Center to remain open following days[insert days selected from Q6.2]?
Q8.1: Would you use Student Support Services (in-person) after 5 p.m. on Mondays-Thursdays?
Q8.2: Which days would you anticipate using Student Support Services (in-person) after 5 p.m.? Please select all that apply.

[22] Subquestions .2 and .3 for questions 1-4 were conditionally asked if the respondent answered "Yes" or "Maybe" to question .1. If the respondent answered no, they were asked the following question number ending in .1. This skip logic applies to staff survey questions as well.
[23] We split this question into two parts to make the survey format for digestible.

Q8.3: Until what time would you prefer Student Support Services (in-person) to remain open on the following days [insert days selected from Q8.2]?

Q8.4: How often would you use Student Support Services (in-person) after 5 p.m. on the days you selected?

Q9.1: Would you use Student Support Services (in-person) after 1 p.m. on Fridays?

Q9.2: Until what time would you prefer the Student Support Services (in-person) to remain open on Fridays?

Q9.3: How often would you use Student Support Services after 1 p.m. on Friday?

Q10: How often would you prefer to receive the following services?

RQ #2

Q11: I feel that I belong at WVC.

Q12: I feel confident that I am on track to graduate.

Q13: I plan to re-enroll at WVC next year.

Table 6: Staff Survey Questions

RQ#1

Q1.1 & 1.2: Which of the following Student Support Services were available at WVC? Please select all that apply.[24]
